EDUCATION

Stanford University, Pursuing a B.S. in Computer Science

2021 - 2025

EXPERIENCE

Software Engineering Intern — bit.io

June 2021 - Present

- Bit.io is building software to store, query, and share data securely and reliably
- Implemented real-time support in the bit.io web interface via WebSockets, visualization for PostgreSQL column statistics, and plotting features to graph and chart data
- Created bots to crawl Reddit and Twitter and auto-share bit.io repositories in order to boost growth

Co-founder & Software Engineer — [Helping Hands Community](https://helpinghandscommunity.org)

Mar 2020 - May 2021

- Helping Hands is a tech nonprofit that streamlines how essential groceries are delivered at scale. Food banks and social service organizations can fulfill deliveries via volunteers and ride-share drivers, en masse and on-demand
- Built the first iteration of the platform (React), backend infrastructure (Node.js + Firebase), and developed integration partnerships with logistics providers like Uber, Lyft, and Axlehire
- Over 500,000 meals delivered as of 03/01/2021 in 50 states

Grid Modeling Researcher — [The Webber Energy Group at UT Austin](https://webberenergygroup.com)

Aug 2019 - May 2021

- Created digital models of Texas's electric grid to simulate economic dispatch, power transmission, and capacity expansion
- Developed a data aggregation pipeline to store, track, and compare model output (Django + PostgreSQL)

Software Engineering Intern — [Pei](https://pei.io)

May 2019 - Aug 2019

- Pei is a FinTech startup developing tech to apply automatic cashback with partner merchants
- Developed a referral program, friend system, and features to dispute missing or incorrect transactions

Software Engineering Intern — [Pei](https://pei.io)

June 2018 - Aug 2018

- Created a web-based interface to display user analytics and consumer insights

PROJECTS

Echo — (getecho.app)

- An app that lets any user start their own short-form podcast series.
- Boosted growth by creating web scrapers to cold-email Instagram and Twitter influencers

Ecuisina — (ecuisina.com)

- Trading platform for users to barter home-cooked foods and experience authentic cuisines locally and affordably.

Gimme SMS — (gimmesms.com)

- Service that lets users without cellular data plans access the web through SMS texting.
- Implemented functionality for turn-by-turn directions, address locations, and weather information.

HeyStay

- HeyStay allows RV campers to rent parking and household amenities on people's private property. Airbnb for RVs.

SKILLS

Programming Languages: Java, Javascript, Node.js, Python, C++, HTML/CSS

Tools: React/React Native, Firebase, Git, Twilio, SQL, Google APIs, Django

Miscellaneous: 3D printing, Arduino, UNIX, Web scraping
